

## ***Polyurethane & Silicone Molding***

In 1982 Thomas Landers, carrying 17 years of industry knowledge, founded Polycraft Products with the objective of providing exceptional quality in the manufacturing of highly complex and critical molded components.

Today, Polycraft combines over three decades of design and build experience with numerous polymers, while serving customers worldwide.

### **OEM Parts**

are manufactured by compression, spin-cast, transfer, or over-molding techniques

Module Cover (OEM Tooling)

**Molded** seals, pads, sleeves, and other custom parts requiring the wear resistance, thermal insulation, and high strength of Polyurethane

Polyurethane Vibration Pads (Medical and Material Handling)

**Production Tooling** such as nesters and rollers; we provide secondary machining for inserts and fittings to help you meet cost savings goals

Conveyer System Parts and Steel Wheel with Urethane (Packaging)

### **Company Summary:**

Ownership: Private

Socioeconomic: Small Business

DUNS: 066223082

CCR (SAM) Cage Code: 61126

NAICS: 326291, 326299, 332912, 333511,  
333514, 336411, 336412, 339991

### **Quality:**

- AS 9100:2004 Rev. C Compliant
- ISO 9001:2008 Certified
- Statistical Process Control & PFMEA

### **Capabilities:**

- Quality Control: Direct Computer Controlled CMMs, Optical Comparator, FARO Portable 3D Measuring System
- Bonding: Numerous custom bladders and fixtures, various ovens, MIL-A-83377B controlled rooms
- Molding: Various heated presses (maximum 160 Ton) Spin-Cast, and Walk-In ovens
- Machine Shop: CNC Milling, Drilling, and Lathe Machine Centers, Blast Cabinets, Welding and Grinding equipment
- Vacuum Forming: Belovac BV heavy gauge, deep draw, 53x103"

**Prototypes and Production** in various thermoset molding applications are crafted by our team, alongside renowned material suppliers

Roller Holding Tool  
(Material Handling)

Material Transfer Tube  
(Mining)

Over-Molded Urethane on Steel  
(Manufacturing)

Molded, Machined, and  
Assembled Tray (Medical)

Urethane and steel gear gripper  
(Industrial)

Vacuum Formed ABS Cover  
(Transportation)

Compression Molded  
Valve Seals (Automotive)

Handle with Molded  
Urethane Grip (Medical)

**Machining Technology** allows us to design, build, and maintain molds from combinations in epoxy, aluminum, steel, and polyurethane

Aluminum Transfer Mold for a Silicone Gasket

### Our New Home

Due to our steady growth and the desire to increase capacity, in 2014 Polycraft moved into a new customized facility in Greendale, Indiana.

Roughly 10 miles west of our Cleves, Ohio plant, and 25 minutes from downtown Cincinnati, this change provides for increased efficiency, enhanced safety, and greater technology.

**When Results Count...Count on Polycraft**
